1. Write a regular expression engine who only accepts real numbers.

    Real numbers could be positive or negative, fractional (float or double) or integers

Sample Input:

5

5.5

5.05

-5

-5.05

5.5.5

-a

5.-05

+5

Sample Output:

accept

accept

accept

accept

accept

reject

reject

reject

accept
